

Creating a Custom Annual Wall Calendar

The calendar program is part of iLife and iPhoto.

1. Open iPhoto
2. Click the + sign bottom left under projects
3. Name the Album (Calendar 2009)
4. This empty album now appears under albums
5. Go to photo library and select photo's for inclusion in your new calendar. Highlight selected photo's and drag to the empty album titled Calendar 2009
6. Bottom of window – click on Calendar
 - This opens window for style selection (settings)
 - Select a style and click choose
 - Select the month you wish the calendar to start
 - Select the number of months
 - Show National Holidays/Birthdays/Anniversary's
 - Check the Apple box to show created on a mac
7. Loading Calendar – Tells you to drag selected or all to Calendar photo's Project
8. Click on Blue tab – top window – this shows page layout options select December
9. Go to layout at the bottom menu and choose number of photographs per page – check layout options – captions?
10. Drag and drop suitable photo's for the season or occasion
11. You can also click on any date and add comments
12. Check Final Review and when satisfied go to Order.
13. You can check prices and quantities before you commit to placing the order.
