# Prepared Questions

# Questions

My Messages app and icon  
disappeared from my new  
computer.

# Questions

Mac Pro, screen froze. Nothing would change the current screen. Quit using it. Went back couple of weeks later---works ok?

# Questions

Apple Care is good until April 24, 2024. Should I take it back to the Apple store in Atlanta??

# Questions

My Mac Book Pro 2015 is too old to update. Is it a security risk if it will not update from 12.6.9?

# Questions

I have two Mac's (old and pretty new), one iPod, one iPhone—  
cannot get them to sync my stuff---  
texts, pictures, messages, emails??  
How to do that?

# Questions

My Inbox is up to 5600 emails, and I'm getting warnings that I'm up to 90% of my allocation. When I peruse the new messages I leave most of them because they are not worth my looking at. I flag some, and I have numerous folders and rules for those I want to keep (at least a while). Is there some way to sort the Inbox so I can do some wholesale deleting?

# Questions

Apparently I unintentionally chose to have Norton / McAfee notify me of viruses.

About every 10 seconds I am getting a notification of numerous viruses and offers to 'renew' Norton and / or McAfee, which I've never employed. I've not found a place to turn off these notifications. Assuming there is one, where is it please?
